INDEX TO VOL. IX.

ABEL, J. J. On the true elementary composition of purified adrenalin and the relation of the substance to epinephrin, xvii.

ADAMS, G. P. On the negative and positive phototropism of the earthworm Allolobophora foetida (Sav.) as determined by light of different intensities, 26.

Adrenalin, composition, xvii.

Alcohol, excretion of uric acid, xi.

Agitation, effect on Arbacia eggs, 245, xviii.

Apnœa, 24.

Arbacia eggs affected by agitation, 245.

Auditory affected by visual stimuli, 116.

BACTERIA, chemistry, xviii.

BEEBE, S. P. The effect of alcohol and alcoholic fluids upon the excretion of uric acid in man, xi.

Blood, coagulation affected by adrenalin, 35.

——, coagulation, influenced by formaldehyde, etc., 187.

——, electrical potential, 202.

——, sugar content affected by adrenalin, 35.

Blood pressure in veins, 161, 198.

Brain, irritability during anæmia, 131.

BROWN, O. H. The immunity of Fundulus eggs and embryos to electrical stimulation, 111.

CESIUM chloride, physiological action, 214.

CANNON, W. B. and H. E. DAY. Salivary digestion in the stomach, 396.

Cell substance, method of obtaining, xviii.

Cervical sympathetic, effect of section compared with removal of superior ganglion, xviii.

Chinic acid, influence on elimination of uric acid, xvi.

Chlorides in urine, affected by diuretics, etc., 425.

CROWLES, G. H. A. The relationship between the freezing point depression and specific gravity of urine, under varying conditions of metabolism and its clinical value in the estimation of sugar and albumin, 319.

Color sense, frog, 400.

CUSHNY, A. On the pharmacological action of optical isomers, xiv.

DAY, H. E. See CANNON and DAY, 396.

DEAN, A. L. See HENDERSON and DEAN, 380.

Dextrose from pancreatic digest, 38.

Diabetes, phlorhizin, respiration experiments, xviii.

Diuretics, effect on chlorides of urine, 425, xii.

——, saline solutions, 451.

DONALDSON, H. H. Dr. Halai's observations on the effect of lecithin on the growth of the nervous system of the white rat, xviii.

EDWARDS, G. H. See HENDERSON and EDWARDS, 417.

Epinephrin, xvii.

Eye movements, relation to visual stimuli, 122.

FISCHER, M. H. Artificial parthenogenesis in Nereis, 169.

FOLIN, O. The acidity of urine, 205.

FOLIN, O. On rigor mortis, 371.

Formaldehyde, action on blood, 187.

Fundulus eggs and embryos immune to electrical stimulation, 111.

GEOTROPISM of Paramecia, 245.

GIBSON, R. E. Observations on the urine of the muskrat (Fiber zibethicus), 391.

GIES, W. J. Peptic proteolysis in acid solutions of equal conductivity, xvii.

GIES, W. J. On the irritability of the brain during anæmia, 131.

Gies, W. J., and S. J. Meltzer. Studies on the influence of artificial respiration upon strychnine spasms and respiratory movements, 1.
Gies, W. J. See Taltavall and Gies, xvi.
Glycogen, formation from proteids, 138.
Guthrie, C. C. The influence of formaldehyde on the action of certain laking agents and on coagulation of blood, 187.

Hæmolysis, 187.
——, cold, 72.
Hanford, G. A. A study of the physiological action and toxicology of cæsium chloride, 214.
Henderson, Y., and A. L. Dean. On the question of proteid synthesis in the animal body, 386.
Henderson, Y., and G. H. Edwards. Nuclein metábolism in lymphatic leukæmia, 417.

Immunity of Fundulus eggs and embryos to electrical stimulation, 111.

Kidney, perfusion, 460.

Lecithin, influences growth of nervous system, xviii.
Leukæmia, metabolism, 417.
Levene, P. A. On nucleic acid, xvii.
Light, response of frog, 466.
Lusk, G., and A. R. Mandel. Respiration experiments in phlorhizin diabetes, xviii.
Lusk, G. See Stiles and Lusk, 380.
Lymph-flow, secretin, xv.
Lyon, E. P. Experiments in artificial parthenogenesis, 308.

MacDougall, R. On the influence of varying intensities and qualities of visual stimulation upon the rapidity of reactions to auditory stimuli, 116.
MacDougall, R. On the relation of eye movements to limiting visual stimuli, 122.
Mandel, A. R. See Lusk and Mandel, xviii.
Medusa, reactions, 279.
Meltzer, Clara. See Meltzer and Meltzer, 57, 147, 252, xviii.
Meltzer, S. J. Some observations on the effects of agitation upon Arbacia eggs, 245, xviii.
Meltzer, S. J., and Clara Meltzer. On a difference in the effect between the simple cutting of the cervical sympathetic nerve and the removal of the superior ganglion, xviii.
Meltzer, S. J., and Clara Meltzer. A study of the vasomotor nerves of the rabbit's ear contained in the third cervical and in the cervical sympathetic nerves, 57.
Meltzer, S. J., and Clara Meltzer. The share of the central vasomotor innervation in the vasoconstriction caused by intravenous injection of suprarenal extract, 147.
Meltzer, S. J., and Clara Meltzer. On the effects of subcutaneous injection of the extract of the suprarenal capsule upon the blood-vessels of the rabbit's ear, 252.
Meltzer, S. J. See Gies and Meltzer, 1.
Mendel, L. B., with H. C. Thacher. On secretin and lymph flow, xv.
Metabolism, dextrose from pancreatic digest, 380, xviii.
——, glycogen, 138.
——, nuclein, 417.
——, proteid synthesis, 386.
Moore, A. Some facts concerning geotropic gatherings of Paramecia, 238.
Muscular contraction, effect on circulation, 161.

Nervous system, growth influenced by lecithin, xviii.
Nucleic acid, xvii.
Nucleic acid of wheat embryo, specific rotation, 69.
Nuclein metabolism in leukæmia, 417.
Nucleo proteid, polarization, 69.

Opitz, R. Burton-. Muscular contraction and the venous blood-flow, 161.
Opitz, R. Burton-. Venous pressures, 198.
Optical isomers, pharmacological action, xiv.
Osborne, T. B. The specific rotation of the nucleic acid of the wheat embryo, 69.
Oxyhæmoglobin, crystallization, 97, xviii.

Paramecia, geotropism, 238.
Parthenogenesis, artificial, 100, 308.
Phototropism, 26.
Proceedings of the American Physiological Society, ix.
Proteid synthesis, 386.

Proteids, a source of glycogen, 138.
Proteolysis, peptic, in acid solutions of equal conductivity, xvii.
Proteoses, physiological action, 345.

REICHERT, E. T. New crystalline forms of oxyhæmoglobin artificially produced, xviii.
REICHERT, E. T. Quick methods for crystallizing oxyhæmoglobin: inhibitory and accelerator phenomena, etc.: changes in the form of crystallization, 97.
Respiration, artificial, effect on strychnine spasms, 1.
Respiration in phlorhizin diabetes, xviii.
Respiratory variations in venous pressure, 198.
RICHARDS, A. N. See VOSBURGH and RICHARDS, 35.
Rigor mortis, 374.

SALINE solutions, diuretic effect, 434, xiii.
Salivary digestion in stomach, 396.
Secretion and lymph flow, xv.
SOLLMANN, T. The effect of saline injection, diuretics, and nephritic poisons on the chloride-content of the urine in the dog, xii.
SOLLMANN, T. The cause of the greater diuretic action of hyperisotonic salt-solutions, xiii.
SOLLMANN, T. The effect of diuretics, nephritic poisons, and other agencies on the chlorides of the urine, 425.
SOLLMANN, T. The comparative diuretic effect of saline solutions, 434.
STEWART, G. N. The influence of cold on the action of some hæmolytic agents, 72.
STEWART, G. N. Differences of potential between blood and serum and between normal and laked blood, 262.
STILES, P. G., and G. LUSK. On the formation of dextrose in metabolism from the end-products of a pancreatic digest of meat, 386, xviii.
Stomach, salivary digestion in, 396.
STOOKEY, L. B. On the formation of glycogen from glycoproteids and other proteids, 138.
STOREY, T. A. The immediate influence of exercise upon the irritability of human voluntary muscle, 52.
Strontium, xviii.
Strychnine spasms affected by artificial respiration, 1.
Suprarenal extract, action on blood-vessels, 147, 252.
Sympathetic, effect of removal of superior ganglion compared with section of cervical sympathetic, xviii.

TALTAVALL, W. A., and W. J. GIES. The influence of citric acid on the elimination of uric acid, xvi.
THACHER, H. C. On the excretion of strontium, xviii.
THACHER, H. C. See MENDEL and THACHER, xv.
TORELLE, E. The response of the frog to light, 406.

UNDERHILL, F. P. New experiments on the physiological action of the proteoses, 345.
Uric acid, elimination influenced by citric acid, xvi.
Urine, acidity, 264.
——, chlorides affected by diuretics, poisons, etc., 425.
——, depression of freezing point and specific gravity related to metabolism, 349.
——, estimation of sugar and albumin, 398.
Urine of muskrat, 398.

VASOMOTOR nerves in rabbit's ear, 57. Vasomotors, affected by suprarenal extract, 147.
VAUGHAN, V. C. The chemistry of bacterial cells, with a demonstration of the apparatus used in obtaining the cellular substance in large amount, xviii.
Venous blood-flow during muscular contraction, 161.
Venous pressure, 198.
Visual stimuli affect auditory stimuli, 116.
Visual stimuli affect eye movements, 122.
VOSBURGH, C. H., and A. N. RICHARDS. An experimental study of the sugar-content and extravascular coagulation of the blood after administration of adrenalin, 35.

YERKES, R. M. A study of the reactions and reaction time of the medusa Gonionema Murbachii to photic stimuli, 267.

W. T. PORTER, M.D., Boston

Vol. IX.—No. VI.

Issued August 1, 1903

BOSTON, U.S.A.
GINN AND COMPANY
1903

CONTENTS.

NEW EXPERIMENTS ON THE PHYSIOLOGICAL ACTION OF THE PROTEOSES. *By Frank P. Underhill* 345

ON RIGOR MORTIS. *By Otto Folin* 374

ON THE FORMATION OF DEXTROSE IN METABOLISM FROM THE END-PRODUCTS OF A PANCREATIC DIGEST OF MEAT. *By Percy G. Stiles and Graham Lusk* 380

ON THE QUESTION OF PROTEID SYNTHESIS IN THE ANIMAL BODY. *By Yandell Henderson and Arthur L. Dean* 386

OBSERVATIONS ON THE URINE OF THE MUSKRAT (FIBER ZIBETHICUS). *By Robert Banks Gibson* 391

SALIVARY DIGESTION IN THE STOMACH. *By W. B. Cannon and H. F. Day* 396

NUCLEIN METABOLISM IN LYMPHATIC LEUKÆMIA. *By Yandell Henderson and Gaston H. Edwards* 417

THE EFFECT OF DIURETICS, NEPHRITIC POISONS, AND OTHER AGENCIES ON THE CHLORIDES OF THE URINE. *By Torald Sollmann* . 425

THE COMPARATIVE DIURETIC EFFECT OF SALINE SOLUTIONS. *By Torald Sollmann* 454

THE RESPONSE OF THE FROG TO LIGHT. *By Ellen Torelle* 466

THE AMERICAN JOURNAL OF PHYSIOLOGY is issued monthly. Each volume will contain about five hundred pages. The price of one volume sent postage free to subscribers in the United States and Canada is five dollars. To subscribers in other countries, five dollars and twenty-five cents (£1 2*s.*; marks, 22; francs, 27), payable in advance.

Subscriptions, manuscript, and all other communications should be sent to Dr. W. T. PORTER, 688 Boylston Street, Boston, Mass., U.S.A.

Contributors will receive fifty copies of their papers free; additional copies may be obtained at cost.

The American Journal of Physiology is represented:

In America, by GINN & COMPANY, 9 Tremont Place, Boston, Mass.

In Germany, by R. FRIEDLÄNDER & SOHN, Berlin, N. W., Carlstrasse 11.

Copyright, 1903, by GINN & COMPANY.

Printed by John Wilson and Son, at The University Press, Cambridge, Mass.

Entered at the Boston, Mass., Post-Office as second-class mail matter, Feb. 13, 1901.
